***Allowable Subject Matter***

1. The following is a statement of reasons for the indication of allowable subject matter: upon close review of the claims, the prior art, and applicant's remarks in the Amendment filed on 7-31-2008, it appears that the allowance of claims 1-20 are appropriate.

The prior art of Masuhiro (US PG Pub. No 2003/0202648), used in the outstanding office action, discloses an IP-PBX comprising protocol handlers that each handle a number of IP terminals and non-IP terminals to increase a load of terminals on the IP-PBX and sharing the load among the protocol handlers rather than an IP-PBX comprising: a first management unit managing up to a first number of Internet protocol terminals; a second management unit managing up to a second number of Internet protocol terminals; an Internet protocol terminal registering unit comparing a current number of Internet protocol terminals managed by one of said first management unit and said second management unit with a corresponding one of said first number and said second number when an Internet protocol terminal requests communication, said Internet protocol terminal having an identification number and an Internet protocol address, wherein if said current number is smaller than said one number, said Internet protocol terminal registering unit associates said one management unit with said identification number and said Internet protocol address, and said one management unit manages said Internet protocol terminal, and wherein, if said current number is equal to said one number, said Internet protocol terminal registering unit associates another of said first management unit and said second management unit with said identification number and said Internet protocol address, and said another management unit manages said Internet protocol terminal. Therefore Masuhiro does not meet the requirements of the claimed invention.

Further, it would be contrary to the teaching in Masuhiro to manage IP terminals by registering the terminals with management units that can add a terminal, compare a current number of registered terminals with a limited number of terminals the management unit can register, and determine which management unit an IP terminal can be registered to since Masuhiro discloses a plurality of protocol handlers that can share a load of terminals to expand an IP-PBX.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 Form.
